Game in progress

Time : August 27, 2020, 14:00 to 16:00

Location : Juvenile nursing home classroom

The number of participants : 4 guests, 11 teenagers

Organizer : Counseling Department

Activity description :

In order to guide the teenagers to learn new knowledge in different ways, since May 109, our institute has cooperated with the Miaoli County Nursing Association, the Drug Control Center and the Student Off-campus Life Guidance Association to organize "multi-course services" with different themes every month. In August, the "Little Hero Anti-drug_Anti-drug Board Game" course was arranged.

The textbook used in this course is a creative board game developed by the instructor of the Miaoli County Student Life Guidance Association. The game was born out of the famous "Monopoly" game, integrated into the famous attractions and features in Miaoli County. The game simulates the high-risk situations that young people may encounter, and teaches how to reject the temptation of emerging drugs. Improve anti-drug knowledge in an entertaining and educational atmosphere, and get to know Miaoli's characteristic tourist attractions.

The course is led by Huang Wanzhen of the Chunhui Volunteer Team in Miaoli County. The teenagers are in groups of four or three and start the game after understanding the rules. From being jerky at the beginning to getting better, everyone is fully committed. After the winners of each group are selected, the finals will be held. The atmosphere of the audience was enthusiastic and laughed constantly. The teenagers have shown their long-lost innocence, and the ideas and methods of rejecting drugs are believed to have deepened in their hearts.
