

Miaoli Detention Center, Agency of Corrections, Ministry of Justice
2021, Inmates "Caring for the Elderly Vaccination" phone and video interview event

Time : June 28 to July 6, 2021

Location : Guard zone

Participants : 206 inmates

Organizer : Counseling Section

Activity description :

Taiwan is currently committed to the acquisition and delivery of the new coronavirus vaccine. Although the recipients are in jail, they are still very worried about the vaccination of their parents and elders. During the epidemic, we took the initiative to investigate elderly elders in the host family, and immediately opened up the application of the host. More than 200 people used the telephone or line video to meet the elderly elders in the care home.

Zhang Longquan, director of our institute, said that the epidemic and high walls cannot prevent the bloody emotional connection between the host and their families. As long as the host has a need for family connection, the host will be relieved to use the most immediate phone or line video. Reception, let the inmates and there family meet in the air, do the duty and filial piety that the Son of Man should do.
